

HeartSine® samaritan® PAD 350P AED

Public Access Defibrillator with CPR Coaching

Lifesaving Technology for Public Access

Sudden cardiac arrest strikes 7 million people a year worldwide with no warning and no pattern. There's little time to react and even less time to think. This means an Automated External Defibrillator (AED) must be close at hand, easy to use and ready to shock.

The HeartSine® samaritan® PAD 350P offers industry-leading value and environmental protection, all in an easy-to-operate system in the smallest and lightest package available.

Ready to Shock

Portable and lightweight. The samaritan PAD is much lighter 2.4 lbs and smaller than other defibrillators.

Highest level of protection against dust and water. With its IP56 rating, the samaritan PAD 350P defibrillator offers unmatched ruggedness.

Clinically Validated Technology. The samaritan PAD 350P utilizes proprietary electrode technology and SCOPE™ biphasic technology, an escalating, low-energy waveform that automatically adjusts for differences in patient impedance.

Easy-to-Follow Visual and Verbal Guides

User-friendly. Easy-to-understand visual and voice prompts guide the rescuer through the entire resuscitation process, including CPR—a key link in the chain of survival.

Two-button operation. Only two buttons, ON/OFF and SHOCK, for straightforward operation.

Always ready. A System Status Ready Indicator flashes to show that the complete system is operational and ready for use. The device automatically runs a self-check each week.

“Apply pads to patient’s bare chest as shown in picture”

“Stand clear of the patient”

“Safe to touch the patient”

Simple to Own

Two parts, one expiration date. The innovative Pad-Pak™, an integrated battery and electrode single-use cartridge with one expiration date, offers one simple maintenance change every four years.

Low cost of ownership. With a shelf life of four years from date of manufacture, the Pad-Pak offers significant savings over other defibrillators that require separate battery and electrode replacements.

Pad-Pak and Pediatric-Pak™ with pre-attached electrodes.

The HeartSine samaritan PAD's built-in intelligence and unique Pediatric-Pak ensure the appropriate energy level is delivered for children, between 1 and 8 years of age or up to 55 lbs/25 kg.
